Acronis Cyber Files Replacement: Choosing a Future-Ready EFSS Alternative

FILECLOUD

Acronis Cyber Files

Acronis Cyber Files has Reached End of Life

Updates Stop

No new features and no further fixes from the vendor.

Risk Grows

Unpatched file-sharing software is an exposed target for attackers.

Time is Short

Plan the move before support ends on Dec 31st 2026.

What a Replacement Must Deliver

Data Control

You decide where files live and who can reach them.

Safe Sharing

Internal and external sharing with permissions and expiry.

Any Device

Web, desktop sync and mobile access for every user.

Governance

Audit trails, retention and compliance reporting.

FileCloud at a Glance

Flexible Hosting

On-premises, private cloud or vendor-hosted.
You choose.

Sync and Share

Browser, desktop and mobile apps with controlled sharing.

Security

Encryption, access policies and leak-prevention controls.

Integration

SSO, MFA, NTFS, REST API, MS Office, Google Docs and more!

Service Provider Licence

Enables MSPs to provide a private cloud experience to their clients.

Data Governance

Extensive audit logs, strict retention policies, granular file & folder permissions.

Support

Global 7x24x365 solution support, live support with subject matter experts.

Compliance

Data residency, built-in compliance (GDPR, HIPAA, NIST, ITAR)
